Question 1

Correct

Mark 1.00 out of 1.00

Write a Program to Implement the Quick Sort Algorithm

Input Format:

The first line contains the no of elements in the list-n

The next n lines contain the elements.

Output:

Sorted list of elements

For example:

| Input | Result |
|----------------|----------------|
| 5 | 12 34 67 78 98 |
| 67 34 12 98 78 | |

Answer:

```

1  #include <stdio.h>
2  void quick_sort(int arr[], int low, int high);
3  int partition(int arr[], int low, int high);
4  int main() {
5      int n;
6      scanf("%d", &n);
7      int arr[n];
8      for (int i = 0; i < n; i++) {
9          scanf("%d", &arr[i]);
10     }
11     quick_sort(arr, 0, n - 1);
12     for (int i = 0; i < n; i++) {
13         printf("%d ", arr[i]);
14     }
15     printf("\n");
16     return 0;
17 }
18 void quick_sort(int arr[], int low, int high) {
19     if (low < high) {
20         int pi = partition(arr, low, high);
21         quick_sort(arr, low, pi - 1);
22         quick_sort(arr, pi + 1, high);
23     }
24 }
25 int partition(int arr[], int low, int high) {
26     int pivot = arr[high];
27     int i = (low - 1);
28     for (int j = low; j < high; j++) {
29         if (arr[j] <= pivot) {
30             i++;
31             int temp = arr[i];
32             arr[i] = arr[j];
33             arr[j] = temp;
34         }
35     }
36     int temp = arr[i + 1];
37     arr[i + 1] = arr[high];
38     arr[high] = temp;
39     return i + 1;
40 }
```

| | Input | Expected | Got | |
|---|-------------------------------------|-------------------------------|-------------------------------|---|
